

# DECOLONY

---

Join the 21st century's revolutions

[decolony.io](https://decolony.io)

A solid orange horizontal bar spanning the left side of the slide.

**“Don't you know  
Talkin' 'bout a revolution  
It sounds like a whisper”**

**- T. Chapman**

**“It takes a revolution  
to make a solution”**

- B. Marley

# DECOLONY

**The pain**

1. Talent is highly distributed, yet opportunity is highly centralised.

Barriers to entry still high.

---

“The workforce of the future doesn’t  
get the unwritten rules of hierarchy.”

- Seth Mattison,  
founder of FutureSight Labs

---

2. Current solutions  
are neither inclusive nor  
diverse or distributed.

Therefore not sustainable

## 2. Current solutions

considers as a *waste*, the “*passion, talent, and energy people invest in online communities, free open source software projects and other hobbies*” in place of commercial projects.

Note. Linux came out of a ‘hobby’ ;)

2. Current solutions  
considers that it's about you  
first, then the idea.

The People are Kings

# The solution

# Decolony.io

We take business construction process, deconstruct it,  
bring it to the people.

Let the revolution begin!

What it is

DECOLONY

is like startups,  
but better.

Built around projects and ideas,  
organization are decentralized,  
agile, inclusive and evolutive.

# DECOLONY

brings projects from ideas to reality

Get things done. Simply.

How it works

## Step 1

Users submit project proposal.

There is a census on the project people like. Project value increases.

The one that is worth the most gets selected.

## Step 2

Users join the project they love. Teams are formed.

They contribute to it based on the skills needed.

## Step 3

At the end of the project, when objectives are reached, total project value is redistributed equally among the team members.

People can then move to the next project of interest.

---

# Value : Token

The more projects you push to completion, the sweeter the reward.

Each team member receives a token at the end of the project.

The competition

---

# DECOLONY

- ❑ It's not (only) about you. It's about the project or idea and skills needed first, then about you.
- ❑ The more you participate in projects, the more token you receive and the higher your expertise,

## VS. EXISTING COLONIAL MODEL

- ❑ It's about you and how awesome you are
- ❑ The higher your expertise, the more influence you have

---

# DECOLONY

- ❑ Overtime you build experience, demonstrate how much you participate in projects
- ❑ Your expertise does not give you more influence on others; though it does weight on the project voting process

## vs. COLONY

- ❑ Overtime you build expertise, demonstrate how awesome you are
- ❑ Your expertise does give you more influence on others

---

# DECOLONY

# Market Validation

# Businesses

59%

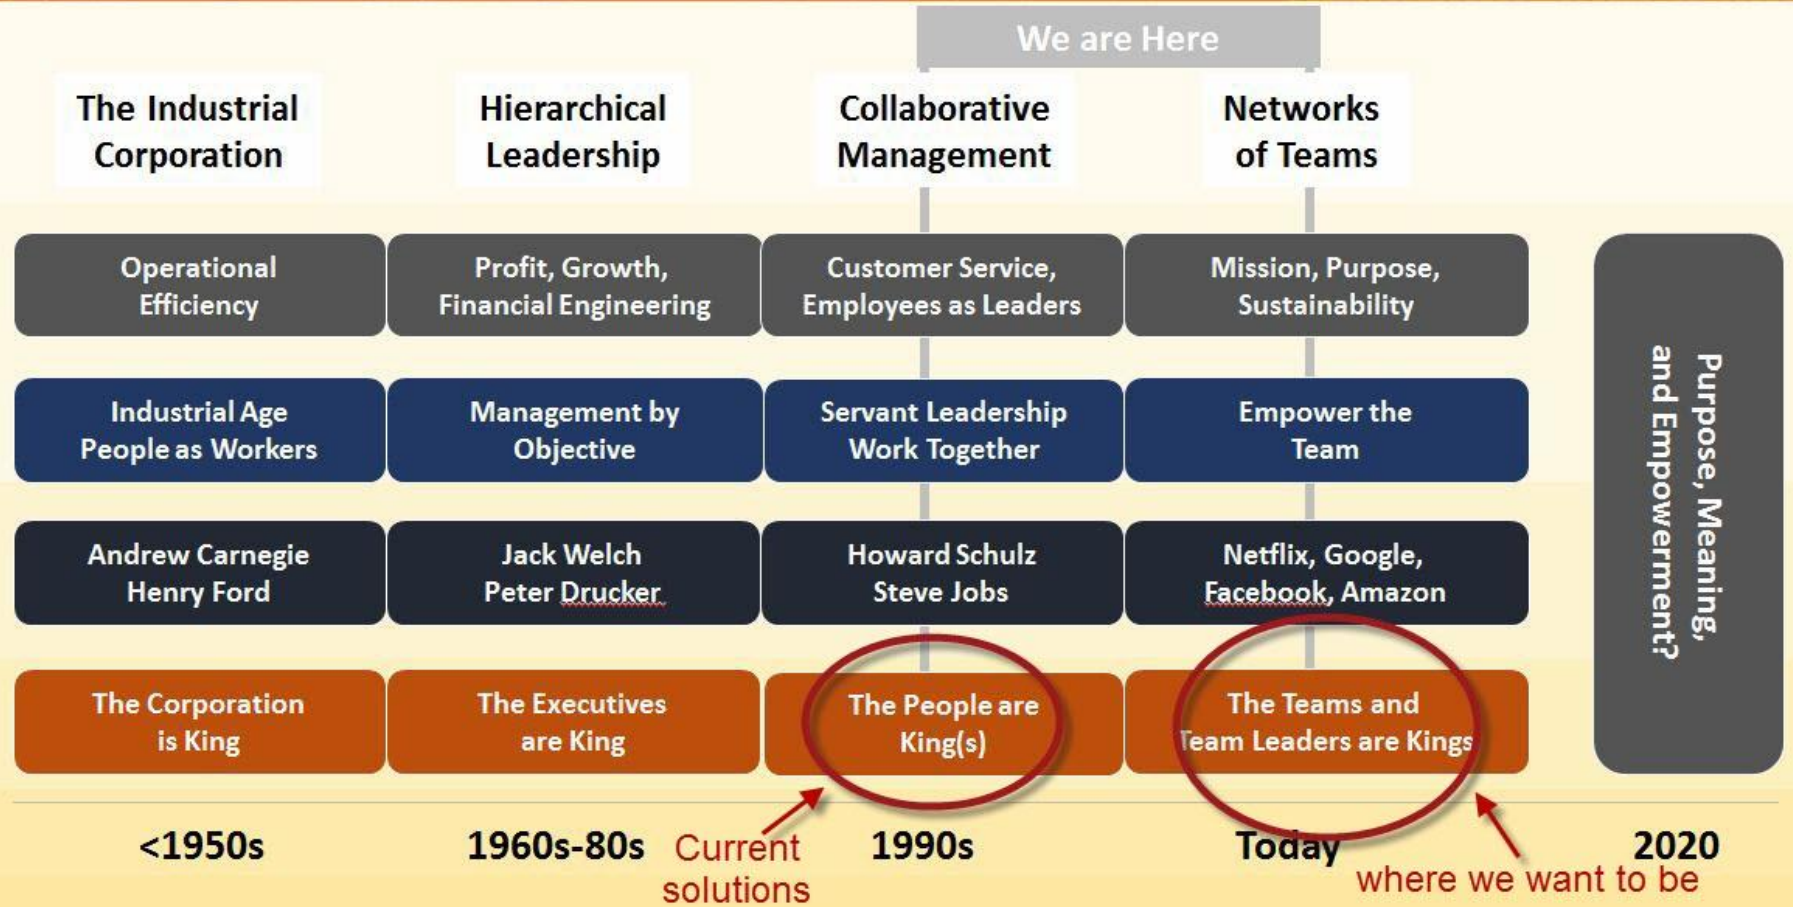

have no program on diversity  
in leadership

7%

have programs to build  
Millennial leaders

# The Evolution of Management Thinking

# Audience

Marc, 22  
Home Sales Adviser

“I usually advise people on products, for once I want to support them on ideas. ”

Jasmine, 34  
Freelance Developer

“I am quite good at what I do. But I can do so much more... I want to make sense of it, in projects I love.”

Yasmina, 41  
Landscape photographer

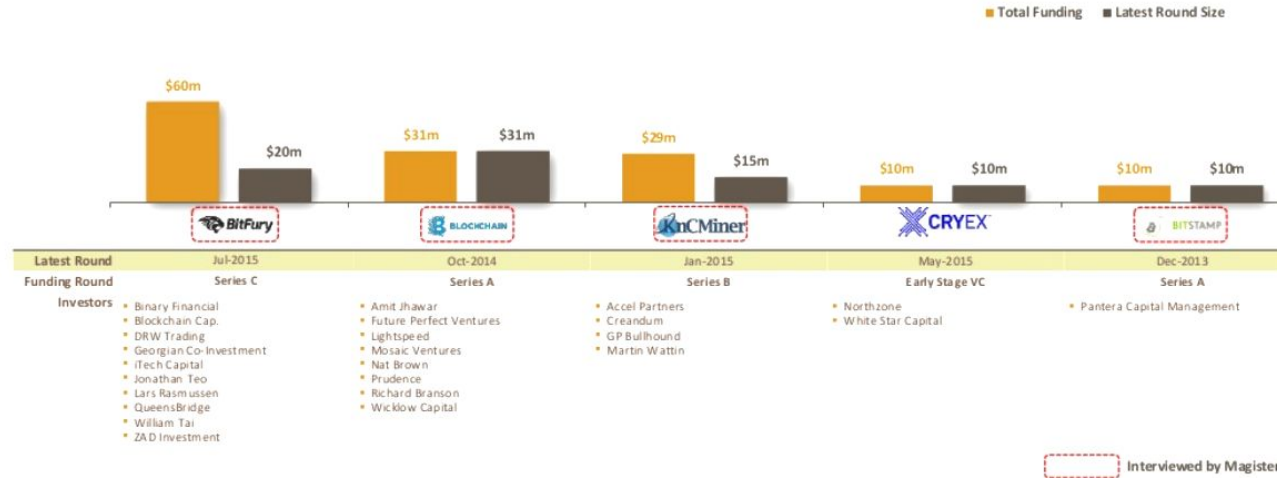

“I always wanted to be my own boss. Now that I am, I want to help others do it.”

Why now?

# Momentum & Market size

5 Bitcoin / Blockchain companies have raised in Europe at least \$10m between 2013 and 2015

## EU BITCOIN/BLOCKCHAIN COMPANIES WITH \$10M+ OF FUNDING

Business model

B2C

PaaS (platform-as-a-service)  
Token-based

# The Technology

Programming languages  
& frameworks

JavaScript, HTML, CSS / SASS  
front-end

Node.js, Mongo DB or MySQL  
back-end

Business logic on the Ethereum  
blockchain, Distributed Ledger of Trust

“Trust is a foundational element of business. Yet maintaining it is expensive, time-consuming, and, in many cases, inefficient.”

That is why Decolony puts trust at the core of the digital building process.

Trust in people having the skills necessary to do the task, trust in people trading training, trust in a census between people in validating the projects selection and completion.

That is the best user case for our Distributed Ledger of Trust.
